DETAILED ACTION

1. Applicant's amendment and accompanying remarks filed October 30, 2007 are acknowledged.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 2. Claims 1 and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Chi et al., U.S. Patent Number 4,460,640.

Chi discloses fiber reinforced glass composites wherein the composite comprises silicon carbide fibers in a thermosetting resin (see Example 7). It is disclosed in Example 2 of the reference that the composite has a density of 1.0 g/cm³ as required by the present claims. Since the reference teaches the components as claimed, the resulting composite article would be inherently capable of being configured as at least a component of a rocket nozzle.

10/721,697 Art Unit: 1794

Claims 1-6, 8, 11-14 rejected under 35 U.S.C. 102(e) as being anticipated by Klett et al., U.S. Patent Number 5,744,075.

Klett discloses a fibrous preform wherein the preform comprises carbon fibers that can be rayon or polyacrylonitrile fibers (see reference claims 1 and 3). Additionally, the reference discloses that the preform comprises carbonizable organic powder (see reference claim 1). Klett discloses that the matrix material is a phenolic resin (see column 4, lines 4-8). It is disclosed in the reference that the density of the preform is 1.0 g/cc as required by the present claims (see column 4, lines 4-8). The reference meets all the limitations required by the present claims. Since the reference teaches the components as claimed, the resulting composite article would be inherently capable of being configured as at least a component of a rocket nozzle.

Response to Arguments

4. Applicant's arguments filed October 30, 2007 have been fully considered but they are not persuasive. Applicant argues that the Chi reference does not disclose configuring the composite article as at least a component for a rocket nozzle. The Chi reference discloses a composite article with the same components and specific density as required by the present claims. The present claims are drawn to a composite article and not a rocket nozzle. Additionally, the body of claims 1 and 13 are not commensurate in scope with the preamble. As written, the claims have different expectations within the claims. Applicant argues that the Klett reference does not

Application/Control Number:

10/721,697 Art Unit: 1794

disclose the composite article as at least a component of a rocket nozzle. The Klett reference discloses a composite article with the same components and specific density as required by the present claims. The present claims are drawn to a composite article and not a rocket nozzle. Additionally, the body of claims 1 and 13 are not commensurate in scope with the preamble. As written, the claims have different expectations within the claims. The arguments are not persuasive. The rejections are maintained.

5. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communication from the examiner should be directed to Camie S. Thompson whose telephone number is (571) 272-1530. The examiner can normally be reached on Monday through Friday from 7:30 am to 4:00 pm. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Terrel Morris, can be reached at (571) 272-1478. The fax phone number for the Group is 571-273-8300.
